

G. POORNACHANDU

Java Full Stack Developer

Bangalore, India | +91 9063364762 | gpoornachandunaidu@gmail.com | [linkedin.com/in/poornachandu9090](https://www.linkedin.com/in/poornachandu9090)

PROFESSIONAL SUMMARY

Entry-level Java Full Stack Developer with hands-on project experience in Core Java, Object-Oriented Programming (OOP), Spring Boot, Spring MVC, Hibernate, JDBC, Servlets, and MySQL, paired with front-end development skills in HTML, CSS, JavaScript, and Bootstrap. Experienced in designing RESTful Web Services with MVC architecture, API testing with Postman, and debugging application issues. Seeking an entry-level Software Developer / Java Full Stack Developer role.

TECHNICAL SKILLS

Backend: Core Java, Object-Oriented Programming (OOP), Collections Framework, Exception Handling, Multithreading, Spring Boot, Spring MVC, Hibernate ORM, JDBC, Servlets, RESTful Web Services / REST API Development, MVC Architecture, Microservices (basics)

Database: MySQL — CRUD, Joins, Aggregate Functions, Subqueries, Relational Database Design

Frontend: HTML5, CSS3, JavaScript (ES6), Bootstrap 5 — responsive, mobile-first UI design

Tools & Practices: Eclipse, IntelliJ IDEA, Postman (API Testing), CI/CD (basics), Debugging, Software Troubleshooting

PROJECTS

Employee Management System

2025

Core Java · Spring Boot · Spring MVC · Hibernate ORM · MySQL · REST API · Postman

- ▶ Built a full-stack application with RESTful APIs supporting complete CRUD operations on 1,000+ employee records, using Spring Boot with a layered MVC architecture (Controller, Service, Repository).
- ▶ Integrated Hibernate ORM with MySQL, cutting manual query effort by 40%; tested 15+ API endpoints in Postman to confirm 100% functionality before handoff.
- ▶ Added structured error handling, input validation, and debugging support across the API layer, following RESTful conventions and MVC design principles to improve reliability.
- ▶ Designed a normalized MySQL schema with primary/foreign key relationships across employee, department, and role entities to maintain data integrity.

Slay It — E-Commerce Web Application

2024

HTML5 · CSS3 · JavaScript · Bootstrap 5

- ▶ Built a responsive, multi-page e-commerce site (Home, Products, Cart, Contact) using Bootstrap 5's mobile-first grid, tested across 5+ screen sizes.
- ▶ Implemented dynamic cart interactions and JavaScript form validation, cutting user input errors by 60% and improving the overall checkout experience.

ADDITIONAL ACADEMIC BACKGROUND (ELECTRICAL & ELECTRONICS ENGINEERING)

Single Inductor Multi-Port Power Converter for EV Vehicles

2024-2025

Final-year B.E. project — circuit design & simulation

- ▶ Designed a multi-port power converter for EV energy management, achieving stable voltage regulation ($\pm 2\%$) across varying load conditions.
- ▶ Validated 95%+ efficiency across 10+ simulated load scenarios using industry-standard simulation tools.

VLSI Design Internship

2024

Digital circuit design & CMOS fundamentals

- ▶ Designed and simulated 5+ combinational and sequential digital circuits as part of front-end chip design training.

EDUCATION

B.E. — Electrical & Electronics Engineering

May 2025

Siddhartha Institute of Science and Technology, Puttur | CGPA: 8.50 / 10

Relevant Coursework: Digital Electronics, Microprocessors & Microcontrollers, Control Systems, Power Electronics, Programming Fundamentals

CERTIFICATIONS

- ▶ SQL (Basic) — HackerRank, Issued 24 Feb 2026 (ID: DDAEE534B29D)

LANGUAGES & STRENGTHS

Languages: English (Professional), Telugu (Native), Hindi (Basic)

Strengths: Quick Learner, Team Player, Analytical Thinking, Problem Solving, Attention to Detail, Adaptability
